BOATANCHORS Digest 3508

Topics covered in this issue include:

- 1) Please check  
by David Stinson <arc5@ix.netcom.com>
- 2) Old Engineering Books  
by Mike Sullivan <vze344qr@verizon.net>
- 3) 400 VOLT FILTER CAPS  
by jackiv@juno.com
- 4) FS: PRC-74B,C & TRC-77 TM's  
by WA5CAB@cs.com

The library where I work has thrown out some classic books. I got:

Network Analysis - Van Valkenburg Second Edition, 1964  
A first semester Electrical Engineering course. Classic.

Radio Engineers' Handbook - Terman  
Encyclopedic treatment of the art, 1943

Electronic Circuits - Angelo  
A serious treatment of both tube and transistor circuits, 1964

Communications Networks, Vol I and II - Guillemin 1931, 1935  
Serious treatment of lumped constant filters and long lines, etc. MIT professor.

I got some fine math books as well including:

Mathematical Analysis - Apostol, 1957  
A classic treatment at senior or first graduate level including measure theory.

Inequalities - Hardy, Littlewood, Polya Second Edition, 1959  
Another classic often referenced in my graduate Real Analysis course.  
Three very famous Cambridge mathematicians.

The Number System - Thurston  
Axiomatic treatment.

All neat books, all bring back many memories. I will publish another  
list of books in a few days once I shelve these finds.

Mike

From: jackiv@juno.com

for sale---400 volt 560 mfd new stock Nichicon caps  
radial terminals.. 3.125" long, 1.125 dia.  
very low ESR. 8 of there in series will be  
excellent for that 2800 volt p.s. 70 mfd!!

while they last \$32.00 for10 plus shipping

USA only

Groups,

TM reprints for sale:

TM 11-5820-590-35-1	AN/PRC-74B,C Depot Maint.	\$45.90
TM 11-5820-473-12	AN/TRC-77,A Op/Org Maint.	\$14.10
TM 11-5820-473-24 (Prelim)	AN/TRC-77 Maint.	\$25.90

Plus shipping.

The TRC-77 Maintenance manual is a contractor's preliminary manual and only covers the base model, not the A. However, the person whose request caused me to scan it checked around and reported back that most of the differences are actually covered by the -12. It gives the differences between models as a change in the power connectors on the radio, battery and both chargers from 7-pin to 2-pin and a change of headset from NT-49507B (with standard 1/4" phone plug) to H-140A/GR (with U-229/U). And the A is lighter. Whether there are other internal differences of any consequence I don't know. LOGSA doesn't even list AN/TRC-77(\*).
